Задача 01.

Намерете $P(\{\emptyset\} \times \{\{\emptyset\}\}) \times P(\emptyset)$.

Решение:
$$\{ \underbrace{\varnothing} \} \times \{ \underbrace{\{\varnothing\}}_b \} = \{a\} \times \{b\} = \{(a,b)\} = \{ \underbrace{(\varnothing,\{\varnothing\})}_c \}$$

$$P(\{c\}) = \{\emptyset, \{c\}\} = \{\emptyset, \{(\emptyset, \{\emptyset\})\}\}$$

$$P(\emptyset) = \{\emptyset\}$$

$$P\big(\{c\}\big)\times P(\varnothing)=\{\varnothing,\{c\}\}\times\{\varnothing\}=\{(\varnothing,\varnothing),(\{c\},\varnothing)\}=\{(\varnothing,\varnothing),(\{(\varnothing,\{\varnothing\})\},\varnothing)\}$$
